Performance

The performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The current performance may be lower or higher than the performance data quoted. It is not possible to invest directly in an index.

Performance is depicted using the Time-Weighted method for the entire period.

Time-Weighted - The geometric (compounded) return measured on the basis of periodic market valuations of assets. If applicable, the return includes the effects of leverage. Unlike the dollar-weighted method, it minimizes the impact of cash flows on the rate of return; however, in principle it requires valuations to be made on the occasion of each cash flow. Approximation to this measure can be obtained by prorating cash flows to successive valuation points or by computing internal rates of return between valuation points. If there are no interim cash flows, the time-weighted return, compounded annually determines the entire value of an investment.

Returns are calculated net of fees.

Annualized refers to the annualized return from the inception date of the account, or the selected beginning date when using the date-to-date functionality.

The inception date indicates the date of account or household initiation in the Portfolio Performance system. This date may not match the date the account was opened.

All performance figures exclude unpriced securities (including securities of indeterminate value), limited partnerships (other than limited partnerships classified as Alternative Investments and

appearing in that section of your statement).

Dividends are not guaranteed and will fluctuate.

The CFA Institute has not been involved with the preparation or review of this statement.

Accounts that have been closed may be included in the consolidated performance report. When closed accounts are included in the consolidated report, the performance report will only include information for the time period the account was active during the consolidated performance reporting time period.

Accounts with Real Time Cash may have cash values updated throughout the day, note that this may cause a difference in account values between performance and holdings reports.

Securities Information

Annuities are excluded from rates of returns, account values, charts, and detail report calculations.

Raymond James Certificates of Deposit values will show as contributions on the date they became available to the Portfolio Performance system. They are included through the selected calculation ending date. Prior inclusion of these values in the rate of return calculation is not available.

Values include accrued income. Values are based on trade date accounting method.

This analysis is for informational purposes only and is intended to be used as part of a complete portfolio review with your financial advisor. The data provided in the asset allocation analysis is subject to inherent limitations and is not guaranteed to represent actual asset class exposure(s) within your account(s) at the time of calculation. See raymondjames.com/asset-allocation/faq to learn more. Raymond James and Morningstar data are subject to the availability of fund filings as well as internal analysis and may not represent real-time allocations.

An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although these funds seek to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in them.

Short positions and negative cash values are not included in the allocation.

Clients should not rely on this information in making purchase or sell decisions, for tax purposes or otherwise. Rely only on year-end tax forms when preparing your tax return.

While sources used for pricing publicly traded securities are considered reliable, the prices displayed on your statement may be based on actual trades, bid/ask information or vendor evaluations. As such, the prices displayed on your statement may or may not reflect actual trade prices you would receive in the current market. Pricing for non-publicly traded securities is obtained from a variety of sources, which may include issuer-provided information. Raymond James does not guarantee the accuracy, reliability, completeness or attainability of this information. Investment decisions should be made only after contacting your Financial Advisor.

Within certain packaged products (for example, open-ended mutual funds, closed-ended mutual funds and exchange traded funds), any fixed income security held in the product portfolio is affected by several risks, including, without limitation, interest rate, prepayment, and credit related risks. Any rise (fall) in interest rates may reduce (increase) the value of the investment. An overview of these and other risks is available at raymondjames.com, finra.org, emma.msrb.org, and investingbonds.com.

Packaged products may be represented across multiple asset classes.

This report(s) has been generated using a historical time period, please note that Model and/or S&P Comparison Data, where applicable, will be as of the previous business day and will not retroactively reflect data based on the "as of" time period selected.

Fixed Income

Fixed income securities, including brokered CDs, are priced using evaluations, which may be matrix- or model-based, and do not necessarily reflect actual trades. These price evaluations suggest current estimated market values, which may be significantly higher or lower than the amount you would pay (receive) in an actual purchase (sale) of the security. These estimates, which are obtained from various sources, assume normal market conditions and are based on large volume transactions. Market prices of fixed income securities may be affected by several risks, including without limitation: interest rate risk - a rise (fall) in interest rates may reduce (increase) the value of your investment, default or credit risk - the issuers ability to make interest and principal payments, and illiquidity risk - the inability to sell bonds promptly prior to maturity with minimal loss of principal. An overview of these and other risks is available at raymondjames.com, finra.org, emma.msrb.org, and investingbonds.com.

Investors interested in regular updates about individual municipal securities can sign up on EMMA (emma.msrb.org) to receive e-mail alerts when disclosure documents are posted on the website. Investors who track particular bonds identified by their unique "CUSIP" numbers can receive an e-mail notification from EMMA every time a new disclosure document is posted for that security. These documents can include annual and other periodic financial filings, operating data and other types of material events. To sign up for an alert, enter a nine-digit CUSIP number into the "Muni Search" function of EMMA.

Securities ratings, provided by independent nationally recognized statistical organizations, also called Ratings Agencies, are appraisals of the financial stability of a particular issuer and its ability to pay income and return principal on your investment. Although they can assist investors in evaluating the creditworthiness of an issuer, ratings are not recommendations to buy, sell or hold a security, nor do ratings remove market risk. In addition, ratings are subject to review, revision, suspension, reduction or withdrawal at any time, and any of these changes in ratings may affect the current market value of your investment. A Rating Agency may also place an issuer under review or credit watch which may be another indicator of a future rating change. Generally, higher yields and/or lower ratings reflect higher perceived credit risk. News events relating to a particular issuer may generally impact the market price, and consequently the yield, of that issuer's securities, even if their rating has not yet changed. Securities with the same rating can actually trade at significantly different prices. The absence of a rating may indicate that the issuer has not requested a rating evaluation, insufficient data exists on the issuer to derive a rating, or that a rating request was denied or removed. Non-rated securities are speculative in nature and are less liquid. Raymond James trade confirmations, online accounts and monthly statements display only the ratings of those Rating Agencies to which Raymond James subscribes. For more information on ratings, please visit moody's.com, standardandpoors.com and fitchratings.com. Individual investors may request Moody's and/or S&P credit reports from their financial advisors. Additionally, Fitch reports are available for municipal bonds.

Additional Information Regarding This Report

pelam@oh-wp.com

Certificates of Deposit (CDs) purchased through a securities broker and held in a brokerage account are considered deposits with the issuing institution and are insured by the Federal Deposit Insurance Company (FDIC), an independent agency of the U.S. government. FDIC insurance covers up to \$250,000 (including principal and interest) for deposits held in different ownership categories, including single accounts, joint accounts, trust accounts, IRAs, and certain other retirement accounts, per issuer. If you purchased this CD at a premium to par, the premium is not FDIC insured. Certificate of Deposit Disclosure Statement is available at raymondjames.com/liquid.htm. For more information, please visit fdic.gov.

Mortgage-backed securities and Collateralized Mortgage Obligations (CMOs) are priced based on average life. The actual maturity date may be shorter than stated. For more information, please review FINRA's Investor's Guide to Mortgage Securities and CMOs at finra.org.

Foreign bonds are subject to additional risks, including without limitation, currency fluctuations, differing accounting standards, political and economic instability, and changes in tax laws. The cost basis for Original Issue Discount (OID) bonds and municipal bonds purchased at a premium may or may not have been adjusted using the constant yield method, providing an approximation of the adjusted cost basis and unrealized gains or losses. Cost basis information is displayed for your information only and should not be relied upon for tax reporting purposes. You should consult your tax advisor to ensure proper tax reporting.

Benchmark Information

Bloomberg U.S. Agg Bd - The Bloomberg U.S. Aggregate Bond index is a measure of the investment grade, fixed-rate, taxable bond market of roughly 6,000 SEC-registered securities with intermediate maturities averaging approximately 10 years. The index includes bonds from the Treasury, Government-Related, Corporate, MBS, ABS, and CMBS sectors.

MSCI ACWI (PR) - A free float-adjusted market capitalization weighted index designed to measure the equity market performance of developed and emerging markets. The index consists of 45 country indices comprising 24 developed and 21 emerging market countries. Developed markets are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, United Kingdom and United States. Emerging markets are: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Morocco, Peru, Philippines, Poland, Russia, South Africa, Taiwan, Thailand, and Turkey.

S&P 500 Total Return Indx - The S&P 500 Index Total Return is a broad-based measurement of changes in stock market conditions based on the average performance of 500 widely held common stocks. It consists of 400 industrial, 40 utility, 20 transportation, and 40 financial companies listed on U.S. market exchanges. This is a capitalization-weighted calculated on a total return basis with dividends reinvested. The S&P represents about 75% of the NYSE market capitalization.

Custom Blended Benchmark 1

FTSE 3 Month U.S. T-Bill Indx 2%, HFRI FOF Composite Indx 15%, MSCI ACWI (Net Div) Indx 55%, Bloomberg U.S. Agg Bd 28% - This index is a measurement of the movement of 3-month T-Bills. The income used to calculate the monthly return is derived by subtracting the original amount invested from the maturity value.

Fund of Funds invest with multiple managers through funds or managed accounts. The strategy designs a diversified portfolio of managers with the objective of significantly lowering the risk (volatility) of investing with an individual manager. The Fund of Funds manager has discretion in choosing which strategies to invest in for the portfolio. A manager may allocate funds to numerous managers within a single strategy, or with numerous managers in multiple strategies. The minimum investment in a Fund of Funds may be lower than an investment in an individual hedge fund or managed account. The investor has the advantage of diversification among managers and styles with significantly less capital than investing with separate managers. PLEASE NOTE: The HFRI Fund of Funds Index is not included in the HFRI Fund Weighted Composite Index. This index is being used under license from Hedge Fund Research, Inc and the performance returns are subject to be revised without notice.
